Construction & Contracting Service List:

- ▶ **Construction & Contracting Services:**
Throughout the course of our core business there are few challenges we haven't encountered. Each project is assessed according to specific criteria with products and material to every project.
- ▶ **Hi-pressure Work:**
Accompanied by specialised industrial personnel to improve work flow, we also use a process that eliminate time wasting, chalked material, loose and dirt.
- ▶ **Technical Approach:**
A highly specialised but critical area, waterproofing is our niche. We are an approved applicator of most widely used waterproofing systems, offering outstanding protection against extreme conditions.
- ▶ **Consulting:**
Let us take care professionally for you, with this essential service. Guaranteed to create the right impact, design and implementation is a vital area assessed with our customary professionalism.
- ▶ **Maintenance Expansion Joints/Repairs:**
Our solid understanding of the installation, repair and reinstatement of movement joints and concrete is critical to the success of a building's structural integrity, and an area you will find we won't compromise on.
- ▶ **Design and Architectural Plans:**
Al Jumairah has a special section for designing and planning all projects (architecture, civil, electrical, and mechanical).

Projects & Past Performances:

It's no coincidence that much of Civil work has been on buildings vulnerable to extreme elements – such is the confidence of the marketplace in the study, execution and quality of our workmanship. Consider what we could do for your investment.

Hotels & Resorts:

We've built up a loyal client base in the hospitality industry, carefully and routinely maintaining their buildings over time. But they also know that they can rely on us to work discreetly & professionally, with minimum intrusion

Heritage Buildings:

We have gained significant ground in the oft delicate restoration and maintenance of historically-significant and listed buildings.

Educational Facilities:

Our teams are aware of the daily activity in these buildings and take it into consideration when working around them, with little or no disturbance (link)

Projects:

It's no coincidence that much of Civil work has been on buildings vulnerable to extreme elements – such is the confidence of the marketplace in the study, execution and quality of our workmanship. Consider what we could do for your investment.

Religious Buildings:

▶ Respect and discretion is employed by staff who work in mosques, etc, without disrupting daily events.

Apartment Buildings & Complexes:

With capacity to reach hi-rise buildings, we work around residents' needs and special requests.

Commercial and Industrial:

▶ Any office block or factory can be Build refreshed or transformed with limited disruption, while maintaining productivity

Al Jumairah Catering Services

Executive Summary

AL JUMAIRAH CATERING SERVICES catering is one of the leading Catering and related support service companies in the area. In just a short period, AL JUMAIRAH CATERING SERVICES has become leading independent contract catering company, serving daily 31000 meals/day in the different business, industry and education sectors, to which we offer various catering packages.

AL JUMAIRAH CATERING SERVICES is old-new company agent of the global AL JUMAIRAH CATERING SERVICES in Iraq and the Arab World.

It combines between its staff's cumulative experiences, modernity of hospitality industry, catering and restaurant service.

AL JUMAIRAH CATERING SERVICES catering services and foods provided a multinational highly qualified team to manage and operate the catering and maintenance services on this demanding project. A full balanced menu for both a la carte and buffet services is provided, with colorful and tasteful foods with multi ethnic pallet.

We built AL JUMAIRAH CATERING SERVICES on founding principles of design, quality and services at affordable prices.

By maintaining an obsessive focus on its customers and a persistent innovative approach to food and design, it comes as no surprise that AL JUMAIRAH CATERING SERVICES has gone from being the newest player to reaching top status today with a team of over 100 experienced and qualified employees.

AL JUMAIRAH CATERING SERVICES Delivers the utmost quality, while always maintaining a close and personal relationship with customers. AL JUMAIRAH CATERING SERVICES achieves that by being vertically integrated and managing every detail of its food production, presentation and event management.

Headquarter in Karrada, Baghdad, Iraq.

Service Offering:

The big day has arrived. This is when the catering team finally puts the itinerary to use, and launch their catering services for another new Client.

Every morning; it is time to check-up and test all the equipment, supplies and foodstuffs. Working from an extensive list with all the supplies, on a daily basis nothing goes unchecked - the crew accounts for every linen, glass, and chafing dish, tray, pot, pan and silver piece.

We even itemize small items like aluminum foil, saran wrap and garbage bags.

Besides we check the industrial ovens, convection ovens, fryers, Refrigerators, Freezers, Cutters, mixers, dishwashers etc... and hot boxes -- followed by tables, pots and pans, glassware, china and serving pieces. Finally, when everything else is set, we load the food.

Business Activity:

- Catering Services
- Facilities Management
- Camp Management
- Catering related consultancy
- Offshore and remote from immediate reach
- Kitchen Design & Equipment Supply
- Housekeeping & Janitorial Services
- Laundry Services
- Landscaping
- Maintenance

Services:

This particular catering event calls for different types of service in order to secure guests satisfaction.

For example, for each Buffet, and in addition to the kitchen staff managers,

Quality:

AL JUMAIRAH CATERING SERVICES proud itself with its quality standards; either Products or Services must meet the utmost criteria in order to qualify with AL JUMAIRAH CATERING SERVICES quality standards. AL JUMAIRAH CATERING SERVICES always uses the ...

- ▶ Quality ingredients and fresh supplies (Meats, Poultry, Seafood, Vegetables and Fruits)
- ▶ Canned foods and groceries will be provided by Major and certified Suppliers and special ingredients for each Nationality will most probably be shipped from the Country of origin.

Clean-up:

After each meal it is time the cleaning team will start the cleaning process, break down and perform a detailed cleaning all the equipment and tables, floors, dishes, glassware and utensils etc.

The cleaning team has to execute the clean-up meticulously.

Our goal is to leave the space as clean. Finally the Quality control will check the cleaning process and will order the cooks to start preparation for the other meal... In this particular situation some of the cleaning and cooking process will go in parallel because we will cater 3 meals per day.

Set-up:

This is where the detailed schedule and daily menu come in handy.

We will be serving the food buffet style or as per the client requirements, the crew will set up stations with serving trays, platters and utensils around the event.

The kitchen staff cooks and prepares the food and buffet attendants and runners keep the stations stocked.

Sterno cups keep food warm and regular ice or even dry ice keeps food cold. For example, at a dessert station, the team will use dry ice wrapped in linen to support a ceramic serving bowl of ice cream.

This prevents the ice cream from melting for three, possibly four hours.

Large seated dinners require even more staff and organization and to keep the line flow from becoming

too congested with people moving about, we use something called the "T formation."

Basically, they set up prep tables in the shape of a T. As the guests pass plates from the base of the "T" up to the top, each person adds one part of the meal until the guest reach the top of the "T".

Our mission is to cater taste and quality, protecting our health and environment and presenting our tailor made trendy presentations.

AL JUMAIRAH CATERING SERVICES intends to become the Premier provider of catering services to organizations that require top-quality food and service and appreciate the finest attention to details.

Set-up:

Chefs, sous Chefs, quality food Control, and cooks, etc...we use this formula to decidewhatthestaffingneedsare:

- ✓ 1 Coordinator per buffet
- ✓ 1 Supervisor per buffet
- ✓ 1 Waiter per 30 – 50 person
- ✓ 1 Steward per 100 people
- ✓ 1 Buffet Attendant per menu item/food station
- ✓ 1 Runner per buffet / station
- ✓ 1 Drink tender per 75 people
- ✓ 1 kitchen Manager per buffet station

- So, a buffet for 150 people with seven buffet stations would have a service staff consisting of three to five waiters, seven buffet attendants, seven runners, one or two stewards and two drink tenders.
- The coordinator meets with the service staff to go over their duties. Some will be manning the buffet stations, some will circulate foods and others will run food from the kitchen to the buffet and bus dishes.
- With everyone properly informed of their responsibilities, the process should run smoothly. Throughout the day, the coordinator continues to oversee each phase, making sure the detailed schedule is strictly followed.

The Team:

Administrative Staff:

- General Manager
- Administrative Assistant

Operations Staff:

- Director of Operations
- Operations Managers
- Purchasing Manager
- Account Manager
- Sales & Advertisement Manager

Robust, Redundant, Scalable

Physical Security

Al Jumairah Group, a Total Security Solutions Company Headquartered in Baghdad - Iraq. We are committed to providing a complete customized security solution, for the customer's specific needs and requirements even for the most challenging scenarios that call for comprehensive security applications. We will analyze the customer's specific needs with a comprehensive site survey and only then determine the appropriate solution.

We provide systems integration, program management, Consultancy and other technical and engineering services that support all security needs. These include but are not limited to building security, Metro scale security and solutions to meet customized defense/security requirements.

We provide innovative solutions, systems support, products and services that prevent or deter threatening activities, improve crisis event planning and response

Physical Security

Our Solutions are scalable and Vendors independent and basically the integration of multiple products and services across a variety of communication requirements. This ability gives our customers the flexibility to create and implement the most appropriate solution for their communication needs. Main Solutions offerings:

- Asset tracking & Fleet Management: Combination of many tracking devices & products on a single tailor made application platform.
- Building Management System / Smart Homes
- Access control - Time & Attendance (Numerous Products)
- Radio frequency Identification (RFID) Applications & Solutions- Fuel Management- Waste Management- Parking- Asset Management, Inventory control, Weapons Management Systems etc. (Mobility Solutions)
- Security Video Surveillance and Monitoring.
- Other Artificial Intelligence Security products.

We developed Partnership Agreements with many International Renown Technology Companies from the USA- Europe - India - Far East.

Data Security:

We provide professional solutions to a wide range of customers both as consultants and as integrators. Our services and solutions include: Compliance survey's, penetration tests, de-sign and deployment plans, security gap analysis and implementation of regulatory requirements of in-formation security. Our targeted clients are Governments, Financial Institutions, Universities and Enterprises.

We specialize in **Cisco** Advanced Security products, **Splunk** and/ or **Alien- Vault**, Webroot-CyberFlow network behavior anomaly detection, **Puppet** IT security automation, **Kaspersky** endpoint security and, penetration test and vulnerability assessment. We work hard to make sure that our clients achieve securely their business objectives.

Our experience in Information Security will provide an added value to your organization. We maintain high standards, not only for providing the requested solution for your organization, but also for providing services at the utmost professional level.

SIOC (Security Intelligent Operation Center):

Responding effectively and in a timely manner to information security threats requires the continuous and thorough analysis of an enormous number of ongoing events. Without an automated toolset to help find patterns, filter, clean and analyze all the data that forms the context of an attack, the task of protecting the organization becomes exceedingly complex, time consuming, resource intensive and expensive.

We provide an effective and efficient service that will monitor your network and security assets 24/7/365. Our service covers all devices, servers, applications, users and infrastructure components; managed centrally from our Security Intelligent Operations Center (SIOC).

The SIOC service monitors all data center resources using situational behavioral context (correlation) – physical and virtual – anywhere in your enterprise. You receive real-

time alerts on security or system-impacting incidents.

We perform forensic risk analysis and audits on your behalf and manage your security and event logs for historical analysis.

The SIOC service is provided by a combination of people, processes and technologies that deliver in real-time situational awareness through the detection, containment, and remediation of IT threats.

We manage security incidents on your company behalf, ensuring that they are properly identified, analyzed, communicated, processed reported.

Our SIOC integrates seamlessly into your security environment to ensure continuous operations. The SIOC is staffed and fully functional around the clock, every day of the year. The SIOC facility is self-sufficient and operates from carrier-grade facilities that have redundant ISP connections, backup power generators and full redundancy.

Few Of Al Jumairah Solutions Partners.

1. *Smart Plate Recognition:*

Analytical Automatic License Plate Recognition Software

Smart Plate Recognition is a US based Company located in Florida, and winner of numerous industry awards. Smart Plate Recognition an industry leader in providing hardware-agnostic fixed enterprise Automatic License Plate Recognition (ALPR) solutions. Winner of numerous Security Awards.

Smart Plate Recognition's hardware-agnostic meaning they do not need proprietary hardware and specialty cameras to work effectively. Smart Plate Recognition's approach to security technology allows for compatibility with any existing security camera, unlike any other ALPR technology.

Smart Plate Recognition software is also easily integrated with any third-party software package and is fully scalable. Additionally, Smart Plate

Recognition's solutions incorporate advanced information-sharing features, allowing for increased collaboration within departments and providing analytic data that is necessary for enhancing security and fighting crime anywhere in the world.

Smart Plate Recognition's solutions consist of ARES for Fixed Location ALPR & Mobile ALPR

Smart Plate Recognition Applications can be used for the Government and the commercial sectors (Parking lots/ Universities/ Hospitals/ etc.)

2. Behavioral Recognition:

GIANT GRAY Graydient Products an Artificial Intelligence Machine Self Learning Software for monitoring & Surveillance- Giant Gray Products for (Video/ SCADA/ Forensic & Cyber)- called Graydient.

Our Main focus is Video.

Giant Gray Products Graydient- V system; a patented self-learning behavioral recognition software for enhanced safety and security. The highly automated system dramatically improves situational awareness and incident response across complex physical environments.

The patented artificial intelligence technology accurately identifies potential and active threats in real time, deploys quickly, & is inexpensive to operate.

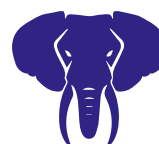

Customers can react faster and more accurately to unfolding safety, security, and operational management situations & to deploy staff more efficiently.

Many of the government agencies and major corporations rely on the technology to protect people, assets, facilities, and borders.

It is a Patented algorithm that enables the system to autonomously learn and alert on unexpected behavior providing enterprise-grade automated behavioral recognition and real-time improvements in safety, security, & situational awareness. It provides an accurate, scalable, and manageable alternative to the traditional monitoring regime."

It operates seamlessly across multiple locations and scales to thousands of sensors, making it the only practical solution for large-scale safety and security deployments. It builds real-time alerts by teaching itself to recognize unexpected behaviors within data streams generated by video surveillance cameras and other sensors.

This self-learning, smarter approach helps users make better, faster safety, and security decisions without overwhelming staff with large numbers of non-critical alerts.
